UI Designer and Developer looking for opportunities to create meaningful product experiences for users. Have more than a decade of software engineering experience using Agile software development methodology.

My Portfolio: in Progress

Work History

2018-06 -

Senior .NET Software Developer, Full-Stack

2019-07

Abbott Diabetic Care, Alameda, CA

Designed the front-end UI for the Universal Upload Utility (UUU) Software Application Suite for Abbott's FreeLibre Diabetic system.

Responsible for front-end UI development, data management and report generation.

2008-05 -

Senior .Net Applications Developer

2018-03

Kratos Defense & Security Solutions Inc., Santa Clara, CA

Worked on the enterprise networked carrier monitoring system called Monics. Monics is a highly distributed application suite which provides monitoring capability to Satellite Operators and Service Providers.

Designed and developed several key C# .NET applications for the Monics suite. Worked closely with product management, PO, and architecture leads. Responsible for all aspects of the application including UI design, backend processes, database access, and test automation.

Worked closely with senior management to lead the company's agile transformation.

Education

2020-01 -

UX/UI Design Certificate

2020-07

UC Berkeley Extension - Berkeley, CA

User-Centric Design Research, User Interface Development, Visual Prototyping and Wireframing, and Web Prototyping and development.

Master of Computer Applications
